

**Gift of Life Donor Program - Statement on Donor Family**

**By Richard D. Hasz, Jr., MFS, CPTC  
Vice President, Clinical Services**

As one of the nation's leading organ procurement organizations, Gift of Life Donor Program is proud to have collaborated with such an outstanding team of medical professionals on the first African American face transplant in U.S. history. We are honored to have coordinated this rare donation on behalf of the donor family and salute their generosity and selflessness. This donor not only transformed one man's life, but saved three others through organ donation. Our thoughts are also with all of the recipients, that they find the healing and hope that donation makes possible. We urge everyone inspired by these stories to remember that more than 100,000 Americans are still waiting for a transplant and about 20 will die each day. To register as an organ donor visit [donors1.org](http://donors1.org).
