

Fall TIPS Toolkit User Interface

Figure 1: Fall Prevention Toolkit User Interface. Nurse completes MFS on left. Evidenced based interventions are automatically selected by the Fall TIPS Toolkit logic on right. Nurse further tailors the intervention set based on knowledge of the patient. The 3 outputs (bed poster, patient education form, plan of care) automatically print the first time the nurse saves the assessment and then reprint whenever one or more output tools are selected in user interface.

FALL T.I.P.S.
TAILORING INTERVENTIONS FOR PATIENT SAFETY

PARTNERS HEALTHCARE MGH MASSACHUSETTS GENERAL HOSPITAL

Patient Name: [] (75 years) MRI: [] (MGH) Location: E12-02 A

Morse Fall Scale: For more info, scroll over each response below

History of Falls - last 3 months: Yes (25)

Secondary Diagnosis: Yes (15)

Ambulatory Aid: None / Bed Rest / Nurse Assist (0) Crutch / Cane / Walker (15) Furniture (30)

IV or Hep Lock Present: Yes (20)

Gait: Normal / Bed Rest / Wheel Chair (0) Weak (10) Impaired (20)

Mental Status: Oriented to own ability (0) Overestimates, forgets limitation (15)

Morse Fall Score: 100

Interventions

Safety documentation

- *Safety Precautions
- Document previous fall
- Review Medication List

Consultations

- Consult with MD/Pharmacist
- PT consult

Assistance with toileting

- Toileting schedule using:
 - Bed Pan
 - Commode
 - Assist to bathroom

Assistance with ambulating

- Provide Ambulatory aid:
 - Crutches
 - Cane
 - Walker
- IV assistance when walking
- Out of bed with assistance:
 - 1 Person
 - 2 Persons
