

Division of General Neurology

The faculty members within the Division of General Neurology are all members of the Brigham and Women's Hospital Department of Neurology and provide assessment of all neurological symptoms. The assessment aids in both diagnostic accuracy and the development of a treatment plan. Recommendations are tailored to help referring providers as well as the patients best cope with their neurological disorder. Many of the faculty have subspecialty expertise and training. In addition to standard assessments, the division also offers virtual evaluations to appropriate patients. The division is highly clinically oriented and has a broad level of expertise in all neurologic conditions.

Faculty

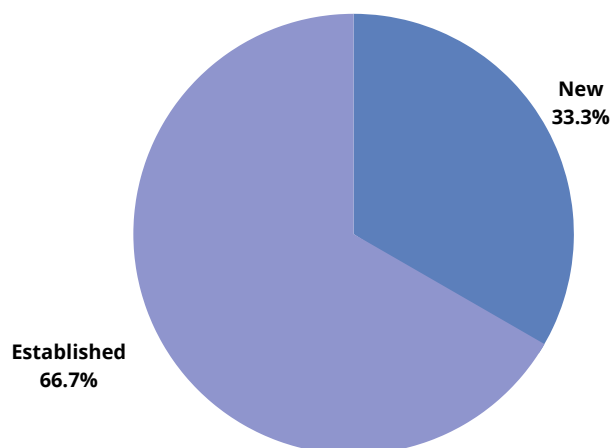

David Pilgrim, MD; Instructor
William Mullally, MD; Assistant Professor
Angeliki Vgontzas, MD; Clinical Director, Assistant Professor
Yoon Andrew Cho-Park, MD; Instructor
Paul Matthew, MD; Assistant Professor
Paul Blachman, MD; Instructor
John Piecyk, MD; Instructor
Ranbir S. Dhillon, MD; Instructor
Alan Geller, MD; Instructor
Angela O'Neal, MD; Chief, Assistant Professor
Lea Abel, PA-C

Training

The Mass General Brigham Women's Neurology Fellowship is a one-year fellowship organized to provide formal instruction, peer interaction, and supervised clinical experience necessary for fellows to master the knowledge, skills, and attitudes essential to the practice of women's neurologic health. The Women's Neurology Fellowship focuses on issues specific to women with neurological disease. This includes managing the common neurological disorders where there are prominent sex issues.

Research

Many faculty members in the BWH Division of General Neurology are engaged in a variety of research projects. These include investigations into sex differences in post-acute sequelae of Covid, medication overuse headaches, equity in stroke outcomes data collection and how to improve in-basket messages to decrease physician burn out.
