

# BWH AMS Patient Seminar

The BWH AMS 6th patient seminar with DFCI AMS as our co-host, was a success! This year we hosted our seminar at a new location “Joseph B Martin Center”, a remote location that allowed for easy and ample parking.

Our BWH pharmacy Director, John Fanikos, opened and closed the seminar with some humble words about AMS and our patients. Speakers and presentations: Jean M. Connors, MD “Urgent or Emergent Reversal of Anticoagulation”, Katie O’Neil, NP “Direct Oral Anticoagulants for Patients with Cancer”, Marc C. O’Meara, RD, LD, CDE “Balanced Nutrition During Anticoagulation”, Andrea Lewin, PharmD, CACP & Peter Collins, PharmD, CACP “When Patients on Anticoagulation Need Surgery”, Maggie Pham, PharmD & Themio Papadopoulos, PharmD “Patient Self-Testing and Self-Management”, and last but certainly not least, Samuel Z. Goldhaber, MD presented “Combination Low-Dose Anticoagulation and Low-Dose Aspirin: Insights form the COMPASS Trial.”

Our patients had the opportunity to ask questions, and meet their primary AMS Managers face-to-face. They were also able to obtain valuable information/resources form our many different educational booths. See below for some pictures from the event!
