Location:	L1 CT / MR Suite, Amb Bldg

The Week Before Your Appointment

- Review all of your medications with your primary physician. Your medications may need to be changed before you come in for your procedure. If you are taking medications that affect blood clotting (such as warfarin, Coumadin, aspirin, ibuprofen), ask your physician to contact us at 617-525-8751.
- If you have diabetes, ask your doctor about how much insulin to take on the morning of your procedure.
- If you develop a cold (with cough or fever) or other illness before the procedure, inform us and your primary physician immediately.
- Arrange for a companion to pick you up after your procedure. You will not be able to drive or take public transportation after the procedure.
- Arrange for a companion to assist you for a day or two after your procedure.

The Day of Your Appointment

- Do not eat or drink anything after midnight on the night before the procedure. You may take a small amount of water with your morning medications.
- Bring your daily medications with you to your appointment. Make sure they are in their labeled containers.
- Bring your BWH blue registration card to your appointment. If you don't have one, get a blue card from Ambulatory Registration as soon as you get to the hospital.
- Arrive at the Cross-sectional Interventional Suite one hour before your appointment.
